PRODUCT DESCRIPTION

The dōTERRA Bubble is a small, motion-activated diffuser designed to hibernate until it detects the presence of movement. Its infrared motion sensor has a 4-metre range, a 120-degree field of view, and stands inconspicuously ready to release your favourite oil or blend into the air whenever someone enters the room. Simple to set up, this powerful mini operates without water and in two mist modes, normal and high, so you can create the perfect aroma ambiance. The dōTERRA Bubble Motion-Activated Diffuser uses 5mL

and 15mL dōTERRA essential oil bottles and can fill a 10 square metre room. This economical diffuser runs up to 12 hours and an indicator light flashes when it's time for the dōTERRA Bubble Motion-Activated Diffuser to be recharged with the provided USB cable. The understated dōTERRA Bubble fits in almost any space and adds a distinctive personal touch to any room in your home.

See diffuser manual and product label for cautions and instructions.
